BOSCHE
WEIGHING SYSTEMS

# Gas Cylinder Scale *FWW*

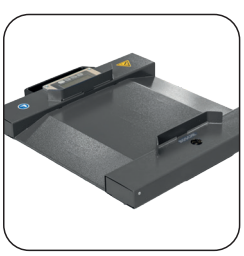

## Functions & Features

- Quality at an affordable price
- Extra-flat design with 2 integrated ramps
- Weighing platform made of powder-coated steel with integrated drive-on ramps
- Weighing capacity: 100 kg / 200 kg
- Resolution: 100 g / 200 g
- Low self-weight: 14 kg
- Maintenance-free and wear-free weighing technology
- Weight indicator integrated into the platform
- Backlit 30 mm LCD large display
- Basic functions: Tare, Zero, Gross/Net
- Memory for the number of weighings and the resulting total weight
- HIGH-LOW-GO function
- Very simple, user-friendly operation

# Gas Cylinder Scale *FWW*

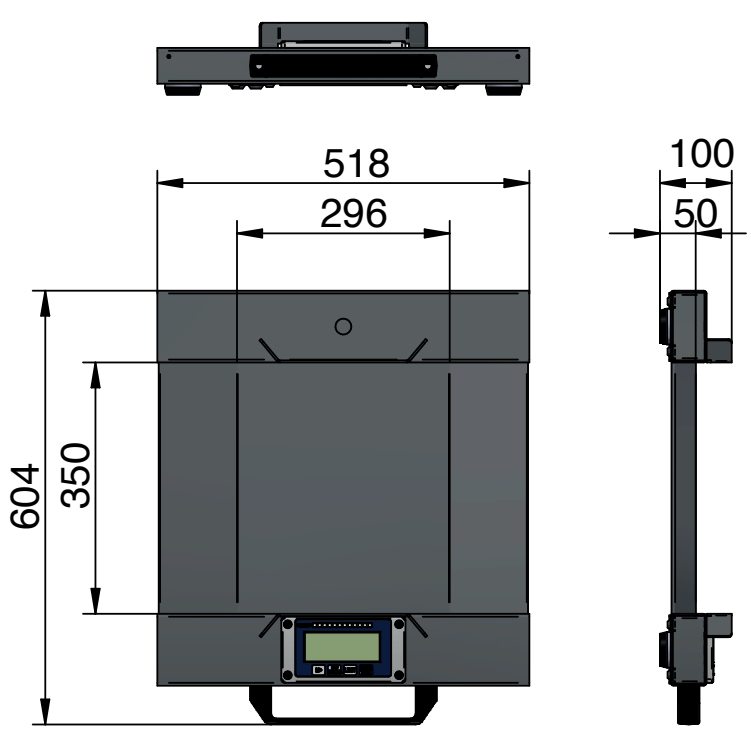

**The perfect scale for all types of gas cylinders**
The high-quality digital gas cylinder scale is used wherever the contents of a gas cylinder need to be determined reliably. Designed for continuous industrial use, it combines a robust weighing platform with an integrated weight indicator – ideal for fast weighing, even in mobile applications. Operation is intuitive via the convenient membrane keypad, making it immediately easy to use even for untrained staff. Thanks to its lightweight, well-thought-out design, the gas cylinder scale is easy to transport and can be used without difficulty at changing locations.

**Construction**
The short, low-profile drive-on ramps are integrated directly into the weighing surface. This makes manual loading possible with significantly less effort. As with all BOSCHE scales, the cables and load cells are protected and routed within the frame. The indicator is installed in the tubular frame of the platform with impact protection; a comfortable handle makes transport and handling easier.

**Set-up**
Position, switch on, start weighing: the FWW is ready for operation immediately – without any time-consuming assembly.

**Weighing technology**
Four high-quality strain gauge load cells ensure stable measurement results. The FWW gas cylinder scale is designed for non-verified applications (not legal-for-trade).

## TECHNICAL DETAILS

**Platform size**
Standard size (without ramps and side edges): 350 × 296 mm.

A platform size manufactured to customer requirements is also possible.

**Weighing capacity**
Standard: 100 kg / 200 kg.
Special versions with a different capacity or a larger platform are available on request.

**Power supply**
The scale is powered by a rechargeable battery, which can be charged via a USB-C port.
