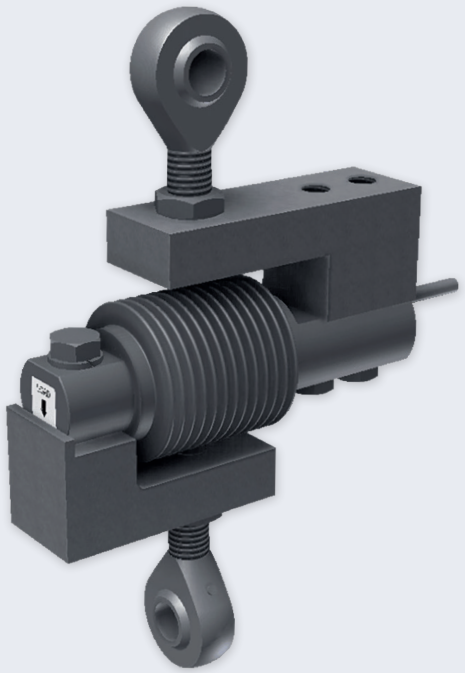
BOSCHE
WEIGHING SYSTEMS

Weighing module *B10-MZ*



Features

- Material: stainless steel or alloy steel
- Rated load: 5 kg - 500 kg
- Robust design for continuous use in the industrial sector
- Easy to assemble
- Force transmission through a ball head, making it self-centring

Application area

- Hanging tank and dosing and bagging scales
- Monorail scales
- Weighing smaller tanks and floor scales
- Mechanical conversion of hybrid scales, digital scales

WEIGHING SYSTEMS

Weighing module *B10-MZ*

Einbaumodul für Hängeanwendungen

The B10-MA load cell installation module was specially developed as a tension device for tension applications of the B10N and B10 S bending beam load cells. The upper and lower attachment parts are connected to the load cell via mounting screws and are designed to ensure symmetrical force transmission for optimum load transmission. The weighing module is made of stainless or alloy steel.
