

▶ Weighing platform CP

Features

- ▶ Stainless steel platform
- ▶ Dimensions: Ø 232 mm
- ▶ Capacity: 3kg / 6kg / 15kg
- ▶ High precision measurement technology
- ▶ Robust and overload-proof

The platforms are equipped with a precise, high-quality strain gauge load cell. This load cell complies with the requirements of the OIML standard.

Optionally, the weighing platform can be equipped with an A/D converter and connected directly to a PC via USB. In this way, the platform can be operated as „USB scales“ directly via the relevant software.

Platform size: Ø 232 mm.

Capacity: 3 kg | 6 kg | 15 kg.

The four rubber feet ensure that the platform scales are stable and secure.

Adjustable load feet and a spirit level help the user to align the scales.

The robust weighing platform CP is equipped with state-of-the-art weighing sensor technology and impresses users with its innovative, round design.
