

▶ Weighing table with counting scale system

Features & Benefits

- ▶ Weighing table with integrated reference and quantity scale to ensure accurate counting of parts with the same weight
- ▶ Large work surface made of Polyethylen (PE)
- ▶ Perfect as picking and inventory scale
- ▶ Ergonomic working
- ▶ Sturdy and durable construction
- ▶ Adjustable feet at stationary version, transport wheels at mobile version
- ▶ Weighing results can be printed directly onto a label
- ▶ Optional: further processing of weighing data into existing ERP systems
- ▶ Optional: legal for trade certification
- ▶ Customized software solutions available
- ▶ Customized weighing tables possible

Weighing table with counting scale system

Workstation with weighing Indicator MCI-T. The data determined as weight, amount, date, Alibi number or part number (if scanned) can be transferred to a printer, PC or a higher-level ERP system. The BOSCHE weighing table consists of a reference

scale for precise calculation of the weight of a single piece and a bulk scale to calculate the total amount of objects. These two scales are connected to the powerful counting indicator MCI-T. This makes it an easy to use and fast counting system.

Integrated three-color signal light with LED technology and high contrast as a signal transmitter for weight and piece control.

If connected to a Windows PC (own or delivered) the **software** visualizes the number of pieces and the weight.

Barcode reader can be used in combination with a Windows PC.

Reference scale
For precise calculation of the reference weight (for example the weighing platform WP).

For documentation of amount and weights just connect a **printer** to the RS 232 interface.

The three-part display (Number/pieces weight/ total weight) provides a good overview.

Bulk scale
Exact calculation of the total amount of the objects to be counted (for example, with the platform TP).

Optional: adjustable height

Stationary or mobile

You can build your individual counting scale system by selecting different platforms from our range and combine these with our powerful counting indicator MCI for fast and precise counting.

Fast - Accurate - Noiseless.
