

Gas Cylinder Scale *FWW*

Features

- ▶ Quality at an affordable price
- ▶ Low profile design with 2 integrated ramps
- ▶ Weighing platform made of powder-coated steel with integrated ramps
- ▶ Capacity: 100 kg / 200 kg
- ▶ Low weight : 14 kg
- ▶ Maintenance and wear-free weighing equipment
- ▶ Display integrated in the platform
- ▶ Backlit 30 mm LCD large display
- ▶ Basic Functions : Tare, Zero, Gross/Net
- ▶ Memory for number of weighings and the resulting total weight
- ▶ HIGH -LOW -GO function
- ▶ Very simple, user-friendly operation

Gas Cylinder Scale *FWW*

Works perfectly with gas cylinders of all kinds

The high-quality, digital gas cylinder scale is used where the content of a gas cylinder must be determined. Bosche gas cylinder scale was developed specifically for industrial use. The combination of the weighing platform with integrated scale display is provided for easy weighing in mobile applications. The intuitive operation via easy keypad and allows untrained personnel an easy operation. Due to its lightweight construction, the gas cylinder scale is easy to use mobile.

Construction

The short and shallow ramps are integrated into the weighing surface. This makes it possible to load the scale with a smaller effort. As with all BOSCHE scales, all the cables and load cells

are laid in the frame and therefore protected against damage. The display unit is installed in the tubular frame of the scale platform. In addition, the cylinder scale features a comfortable handle.

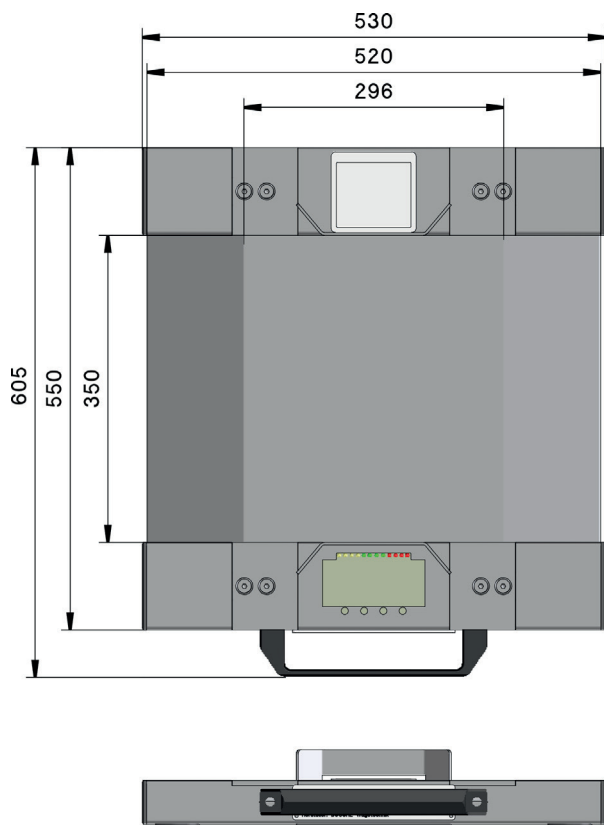

Installation

Immediately after installation, the scale can be operated.

Weighing technology

The platforms are equipped with four high-quality strain gauge load cells. The 30 mm large display with adjustable backlight is very readable. The gas cylinder scale FWW is not designed for custody transfer.

TECHNICAL DETAILS

Platform Size

Standard size (without ramps and side edges) 350 x 296 mm.

Another size made to customer specifications, is also possible.

Weighing range

Standard 100 kg / 200 kg. Special scales with a different weighing range are available on request.

Power supply

The cylinder scales are operated by batteries as standard (5 x 1.5 V AA Mignon) and allow a self-powered weighing.
