

► Parcel scale *PS SST*

Functions & Features

- Quality at a reasonable price
- Stainless steel platform 330 x 330 x 60 mm with 2 m spiral cable
- Capacity: 60 kg / 100 kg / 150 kg
- Display with spiral cable and wall bracket included
- Mains adapter included as standard
- Battery operation possible: 6 x normal AA Mignon batteries
- The weighing surface is removable (e.g.: for better cleaning or for mounting a larger platform)
- Tare weight approx. 3.5 kg
- Dimensions display: 2.5 x 6.5 cm
- Simple operation
- Robust and overload-proof
- RS 232 data interface
- Optional DKD calibration certificate

Parcel scale *PS SST*

Easy to operate and flexible

This parcel scale can be used everywhere in non-legal-for-trade applications, such as incoming goods, in production, in the warehouse or in shipping. With its separate display, it is also possible to weigh voluminous objects without any problems. The scale is practical and, thanks to its user-friendly interface, very easy to operate, even by less experienced personnel. Its low tare weight, flexible mounting capability and battery operation make it possible to use it almost anywhere.

Design

Its separate display is built into a robust aluminium profile and has a waterproof and dustproof membrane keypad, with four pressure point keys. This easy-to-read display is connected to the easy-to-clean stainless steel platform via a two-metre spiral cable and can thus be placed anywhere, or attached to a wall, for ergonomic working. Rubber feet under the weighing platform ensure secure and stable table placement. A wall bracket is supplied as standard for secure wall mounting.

This high-quality, digital PS SST parcel scale has been specially developed for everyday use. It is equipped with four rubber feet, which ensure secure and stable table placement of the shipping scale.

A 230 V mains adapter is included in the scope of delivery; however, it can also be operated using standard Mignon cells. If the parcel scales are operated with batteries, a so-called auto power-off function is activated, which automatically switches off the scales after three minutes without changing the load. Its tare function (multiple tare) makes weighing and order picking easy. This function also enables the straightforward weighing of voluminous items. The easy-to-read display is connected to the easy-to-clean stainless steel platform via a two-metre spiral cable and can thus be placed anywhere, or attached to the wall, for ergonomic working. A wall bracket is included for secure mounting. Its low tare weight, flexible mounting capability and battery operation make using this parcel scale easy for everyone and possible anywhere.

Display and keypad

A bright LCD display ensures good readability of the weighing data. The adjustable backlight guarantees optimal readability even in unfavourable lighting conditions. Intuitive operation is provided by its convenient four-key membrane keypad, making it easy to use, even for inexperienced personnel. The keys have a perceptible pressure point, which make them easy to operate.

► TECHNICAL DATA

Type	Max. capacity	Readability, d	Platform size
PS SST 60	60 kg	20 g	330 x 330
PS SST 100	100 kg	50 g	330 x 330
PS SST 150	150 kg	100 g	330 x 330

Power supply

The parcel scales are supplied with a 230 V plug-in power supply unit, but the scales can also be operated using standard Mignon cells. In addition, the parcel scales have a so-called auto power-off function. This means that in battery mode, the parcel scales switch off automatically after three minutes without a change in load.
