

Pallet truck scale *HLS Touch*

Features

- ▶ TÜV, CE and GS certified industrial quality
- ▶ Weighing range up to 2500 kg
- ▶ Resolution 500 g
- ▶ Easy-to-grip pump and drawbar with extra strengthening for pushing
- ▶ Rubberised drawbar handle with 3 functions „lift-drive-lower“
- ▶ Very robust, agile and silent
- ▶ 4-point load cell weighing system with laser-welded load cells, IP68
- ▶ Overload-proof - extra pressure relief valve for a long service life
- ▶ Quick lift as standard, with smooth lowering
- ▶ Maintenance-free, airtight and dustproof high-performance hydraulic pump made of high-tensile steel
- ▶ Durable hard rubber tandem wheels
- ▶ Optional: Integrated thermal printer (paper or labels)
- ▶ Optional: Small reference scale with high accuracy (1g) for counting small piece weights
- ▶ Elegant aluminium case with a fanless design
- ▶ Windows 10 industrial PC with touchscreen, USB, Ethernet, WLAN and Bluetooth (for scanners etc.)
- ▶ High-contrast 10" display
- ▶ Multi-touch operation even when wearing gloves
- ▶ Powerful Makita rechargeable battery system for off-grid weighing
- ▶ Powerful Makita rechargeable battery system for off-grid weighing
- ▶ Export options to CSV file or SQL database with REST API
- ▶ Data connection to warehouse management systems - LVS
- ▶ USB port for data transfer to a USB stick
- ▶ Simple integration into inventory management and shipping systems

Pallet truck scale *HLS Touch*

Bosche Pallet truck scale HLS Touch

The sturdy pallet truck with a weighing function is the perfect solution for simple and more complex weighing operations at different locations. It saves time and shortens transport routes. The total capacity of 2500 kg, divided into 500 g increments, enables precise weight measurement at any lifting height. The pallet truck scale quickly becomes indispensable as a mobile scale, especially in warehouses, production and dispatch.

Construction

Special attention was paid to the chassis of the weighing pallet truck. A multi-reinforced, impact-resistant frame made of powder-coated steel gives this weighing pallet truck maximum robustness and stability. A sealed compact hydraulic system has been installed in the frame, which is housed in a break-resistant steel casing. Bosche pallet truck scales have tandem rollers as

standard for better manoeuvring over thresholds and obstacles.

Weighing technology - PC

With this mobile weighing system, the scale comes to the weighing objects and not the other way round. A well designed system and intuitive operability thanks to the touchscreen helps to carry out and log all weighing processes quickly.

Power supply and interfaces

A powerful rechargeable battery system with 3 Makita rechargeable batteries (18V 5Ah incl. charger) guarantees a continuous power supply to the scale and the PC during mobile use.

Optional

Small reference scale with high accuracy (1g) for counting small piece weights. Integrated thermal printer (paper or labels)

10" Touch

Windows 10,
WLAN, USB 3.0,
Ethernet

Printer
for direct
output of the
weighing data

Reference scale

for exact determination
of the average
piece weight

**Powerful rechargeable
battery system**
for continuous,
mobile working

Tandem wheels

Enable easy
driving over
thresholds and
obstacles
